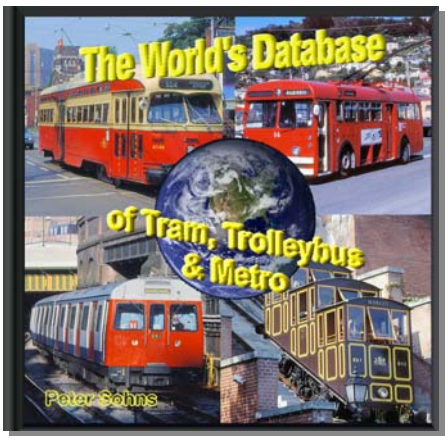
THE WORLD's DATABASE OF TRAM, TROLLEYBUS & METRO

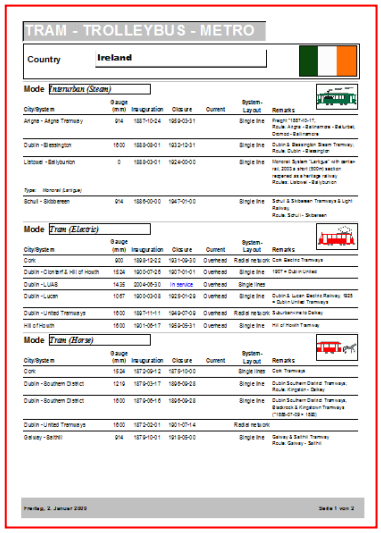


NEW Version 5.6

This MS Access database is a unique encyclopaedia and covers all known tramways, trolleybuses, metros, funiculars, rack-railways, monorails, people movers and operating museums past and present around the world. It will show you the important data like inauguration- and closure date and the gauge of each system at a glance. In addition, it contains information about the System's layout, Current collection, Rack-System, Interurban routes, all including details like extension (km), number of routes, gradient etc.

Any list of such a kind is worthless without a map. Would you really like to search for a small town somewhere around the world in an atlas? Besides, many atlasses do not contain any village which used to have a tram. Therefore, maps showing the location and Interurban-Routes are provided for each country. These PDF-maps are searchable, too.

You will be able to set filters and print out different kinds of reports about each country, mode or city. Statistics are included as well to give you an overview of systems past and present.



TRAM - TROLLEYBUS - METRO

Country Ireland

Mode Interurban (Steam)

City/System	Gauge (mm)	Inauguration	Closure	Current	System-Layout	Remarks
Arigna - Aigle Tramway	914	1887-10-24	1908-03-31		Single line	Freight 1897-06-11 Route Arigna - Belcarrane - Belcurlaw, Connaught - Ballinamore

It is possible to run the database with Access Runtime[1]. This database will be updated continuously! The latest version is guaranteed!

THE WORLD's DATABASE is available on CD and as a PDF-file

CD	Version Access 2007/ 2010, 2013, 2018 – Full ACCDE Database and Access runtime version	29,90 €
CD	Update – Full MDE or ACCDE database (*free by E-Mail via wetransfer*)	9,90 €
PDF	Database – Report Version, all information except "Source", "Mail", ca. 1300 pages	29,90 €
PDF	Database – Complete Report Version, 1 File/page, ca. 9500 pages	29,90 €
	- additional 130 Country files (as **PDF** maps); not available separately	5,90 €
CD	*Old Version for Access 2000, 2002 and 2003 – Full MDE database. Important: This database is from August 2018- it will receive no further update!*	*10,00 €*

Please order by letter, postcard or E-Mail and specify the version required. Prepayment is necessary (plus postage 3,60 €/Europe, 10,00 €/Overseas; Pay Pal plus 1,00 €); no postage if send by E-Mail!

Peter Sohns, Postfach 510106, D-30631 Hannover, Germany, E-Mail: tram.trackmap@t-online.de.

Bank account: Sparkasse Hannover, International Bank-account No. DE17250501 800037884212; PAY PAL and registered letter with cash accepted!

System requirements: This is an Access database; therefore, you need MS Access 2007/ 2010 or higher on your PC. You also need Acrobat Reader (version 5.0 or higher) on your PC to open and view the maps and other documents. For the PDF-Database only Acrobat Reader is necessary.

[1] **Access Runtime:** This database will operate with the Runtime, which is available from Microsoft (free); however, the functionality is limited - you can't set filters and reports from the main form; just few reports are available.

[2] **Update:** If you already ordered a copy of the Database, you are entitled to ask for an update for a reduced price. The Update price includes Postage for Europe (plus 5,00 € Overseas); Free by E-Mail via wetransfer
